SUMMARY

A full stack developer who cares that the product runs reliably and is easy to use. Built a UI kit that cut the number of user actions, made product launches for new clients **2x faster** and set up onboarding for new developers. Open to full-time work: remote, hybrid or on-site in Tashkent.

EXPERIENCE · 2 YEARS 8 MONTHS

Full Stack Developer · Ksi

04.2026 – present · 6 mths

Software Development Services · Remote

- Led the development of an AI platform for data analysis, automating processes that previously required 3 employees and reducing manual processing to 1 employee.
- Optimized the RPC mechanism under high CPU load, improving system performance and stability.
- Developed and evolved an educational platform used by more than 10,000 students.
- Set up monitoring and alerting, which made it possible to detect issues in time and reduce the number of errors in production.
- Built internal libraries and packages that standardized product development and maintenance, cutting the time spent on them by half.

PyTorch Python FastAPI Redis PostgreSQL TanStack Start React Vite TypeScript

Full Stack Developer · Seiko

02.2024 – 04.2026 · 2 yrs 2 mths

Software Development Services · Remote

- Maintained and evolved the company's products, ensuring their stable operation and timely resolution of technical issues.
- Built a UI kit for the company's main product, standardizing interface components and improving UI/UX. This reduced the number of actions and clicks users need to complete key operations.
- Automated and standardized the deployment and configuration of production environments for various clients and products, halving the time of a product's initial launch.
- Mentored new employees and set up their onboarding process, helping them get familiar with the codebase and start on business tasks faster.

Node.js NestJS Redis PostgreSQL Docker Next.js TypeScript RabbitMQ

SKILLS

Programming languages	Python (FastAPI), Node.js (NestJS), Golang, Java (Spring Boot)
ML tools	PyTorch, Pandas, NumPy, TensorFlow
SQL	PostgreSQL, MySQL
NoSQL	MongoDB
Tools	Linux, Git, RabbitMQ, Kafka, Celery, Redis, Docker, Docker Compose, Kubernetes (k8s), Grafana, Nginx, CI/CD, Prometheus, Loki, Terraform, Ansible

EDUCATION

Islam Karimov Tashkent State Technical University

2028

Higher education, Faculty of Electronics and Automation, automating product development with AI

School 21 (Sber)

2026

PEER, DevOps engineer
